

The Conference

The 8th International Conference on Accelerator and Large Experimental Physics Control Systems (ICALEPCS) will be held in San Jose, California, from November 27 – 30, 2001 and is hosted by Stanford Linear Accelerator Center. The conference will take place at the Fairmont Hotel San Jose, in the heart of Silicon Valley.

The fields of control and operation of particle accelerators, detectors, telescopes, nuclear fusion devices, and nuclear reactors will be discussed at the conference. Hardware and software aspects of control systems will also be addressed. The conference program will include oral and poster sessions, seminars, round-table discussions, post-conference workshops, and tutorials. All those involved worldwide in the field of controls and having an interest in the challenging aspects relating to Experimental Physics are invited to participate and to contribute.

ICALEPCS 2001 is about the discussion of product development, new technologies, ongoing research, education, networking and connections. You will have the chance to exchange ideas and explore opportunities in a win-win environment. ICALEPCS 2001 will allow you a great opportunity to concentrate your marketing!

Meet the decision makers in Experimental Physics Controls

Give your products exposure to the people who need and value them! You will have the opportunity to meet the decision makers, physicists and engineers from over 40 major laboratories worldwide, who specify and buy equipment for major international projects. Take this opportunity to demonstrate your products and services.

A unique exhibit opportunity

- Enhance your company's image
- Reinforce customer loyalty
- Demonstrate just-released products and those in the pipeline
- Hear users discuss their needs now and in the future
- Collect quality sales leads to sell your products and services

A sampling of the topics to be presented at ICALEPCS 2001

- Project Engineering and Management
- Software Technologies
- Hardware Technologies
- Status Reports
- Process Tuning and Feedback Systems
- Evolution of a Control System: Maintenance, Upgrading, Re-Engineering
- Selecting and Integrating Industrial Systems in Experimental Physics Controls
