

VERTEX '05

14th International Workshop on Vertex Detectors

VERTEX 2005

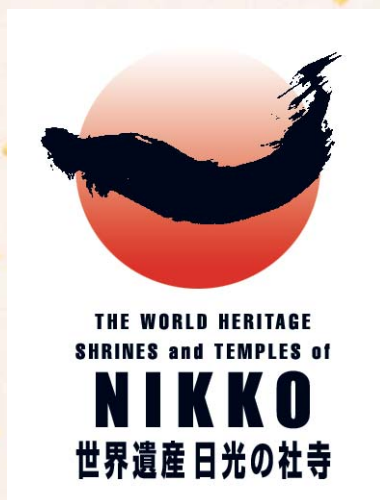

7-11 November 2005
Lake Chuzenji
Nikko
Tochigi, Japan

Workshop topics:

- Existing detectors
- Future detectors
- Monolithic devices
- Novel detectors
- Device simulations
- Radiation hardness
- Front-end electronics
- Reconstruction techniques and triggering
- Applications outside HEP

International Advisory Committee:

D. Bortoletto (Purdue University, USA)
J. Brau (University of Oregon, USA)
R. Brenner (Uppsala University, Sweden)
M. Caccia (University of Insubria, Italy)
D. Christian (Fermilab, USA)
P. Collins (CERN, Switzerland)
E. do Couto e Silva (SLAC, USA)
R. Horisberger (PSI, Switzerland)
A. Litke (University of California, USA)
B. Mikulec (University of Geneva, Switzerland)
S. Watts (Brunel University, UK)
A. Miyamoto (Chair, KEK, Japan)

Participation is by invitation only and limited to about 50; however, a small number of talks will be reserved for contributed papers.

Local Organizers:

A. Miyamoto, J. Haba, Y. Sugimoto,
K. Toyomura, N. Unno (KEK)
