SNS Operations During the Covid-19 Pandemic

Thursday, 7 October 2021 15:15 (25 minutes)

Just like all workplaces, the Spallation Neutron Source (SNS) at Oak Ridge National Laboratory had to adjust to new workplace regulations during Covid. Being part of a large lab was very beneficial for operations. This talk will discuss how we met social distancing, cleaning, and testing protocols, changed meetings, and used remote tools to keep the accelerator running. Finally, I will discuss what changes we will keep in place going forward.

Session

Session II: Running a Beam Particle Accelerator during the COVID-19 pandemic.

Primary author: MILANOVICH, Geoff (ORNL SNS)

Presenter: MILANOVICH, Geoff (ORNL SNS)

Session Classification: Running a Beam Particle Accelerator during the COVID-19 pandemic (II)

Track Classification: Track II: Running a Beam Particle Accelerator during the COVID-19 pandemic
